To ensure your browser functions as best as possible with web applications such as 'CollectMinder', please make the following tweaks to your browser settings:

Internet Explorer 8 Configuration Change:

- Click on 'Tools'
- Click 'Internet Options'
- Under Browsing History
- Click the 'Settings' button
- Click the 'Automatically' radio button
- Click the 'OK' button

- Click the 'OK' button again

Popup Blockers

- If you have any pop-up blocker installed, you must do one of the following:
- Within the settings, tell the software to allow pop-ups for the collectronics.net domain
- If you cannot control the settings for an individual domain, please disable the pop-up blocker while using the Collectronics website
